

MERCHANDISE AVAILABILITY SOLUTIONS

EVOLVE™ MV E10 2.0

Enhance the shopper experience

EVOLVE™ MV E10 2.0

Q

Retailers continue to struggle to deploy solutions that combine inventory management and loss prevention in attractive ways that compliment the stores' aesthetic design. Is there a solution which can offer a practical migration to RFID while still fulfilling store design needs?

A

EVOLVE MV E10 2.0, has been designed to be flexible around the dynamic needs of the retail industry. The E10 2.0 offers a diverse range of design options, plus an integrated visitor counting unit and can communicate with Checkpoint's data analytic app - EVOLVE-Store, leading to a centric solution for complete visibility of your stores.

With almost infinite design options, the E10 2.0 allows for retailers to create an antenna which blends with store aesthetics and branding, ensuring that store entrances are inviting and communicative for potential customers.

Available as RF only, RF/RFID dual technology and RFID only, the E10 2.0 supports Checkpoint's unique One Tag™ approach, using a single RFID tag for inventory visibility and loss prevention; protecting your investment by supporting the migration from traditional EAS to RFID if and when you are ready.

- ✓ **RF AND/OR RFID TECHNOLOGY**
flexible adoption of RFID technology
- ✓ **ALMOST INFINITE DESIGN OPTIONS**
for your store requirements
- ✓ **INTEGRATED VISITOR COUNTING**
enables shopper traffic analysis
- ✓ **EVOLVE-STORE READY**
automation of EAS procedures
- ✓ **ORC JAMMER DETECTION**
detects illegal jammer devices

Dimensions

HEIGHT: 1.5 METERS / 4 FEET 11 INCHES
WIDTH: 0.45 METERS / 1 FEET 5 INCHES
BODY DEPTH: 0.05 METERS / 6 FEET 1/4 INCHES
FOOT DEPTH: 0.16 METERS / 2 INCHES

Frequency

ETSI 865.6 - 867.6 MHz
FCC/IC 902 - 928 MHz
7.2 - 9.5 MHz - NA
8.2 MHz - EU
